Vol. 2, No. 2

Summer 1982

Residential Report

The average sale price of a single family home in Halifax County (including the Halifax/Dartmouth Metropolitan area) during the first four months of 1982 was \$63,604. That's 9.3% higher than for the same period last year.

The continuing high mortgage rates, currently 19% for a 3 year conventional mortgage, are taking their toll on sales and our computer has been keeping a watchful eye on sale prices to determine if they are starting to soften too. There is no conclusive evidence that property prices are falling

but we anticipate that they will if the present mortgage rates continue for the remainder of the year. However, we expect any softening in prices to be a temporary aberration and still hold to the view that there will be a surge in property prices when (if?) mortgages fall below the 15% mark. The cost of building has continued to increase because of the increased materials cost. The ever increasing price of oil is still working its way through the price of building materials and, of course, the Province of Nova Scotia was responsible for a 2% increase recently with its increase in sales tax (every little bit helps!).

In the Summer 1980 Issue of Newsletter (Volume 1, No. 10), we pointed out that the glut of office space in Halifax/Dartmouth was disappearing and we forecast large rent increases in the future, as landlords attempted to push them up to economic levels. Preliminary indications are that office rents have risen 40% over the last year with Class A space now renting at \$151 to \$183/m² (\$14 to \$17 per ft.²) on a net absolute to landlord basis, i.e. the tenant pays all operating expenses, including real estate taxes, in addition to his rent. New office space in the pipeline is projected to come on stream at \$194 to \$210/m² (\$18 to \$19.50/ft.²). However, this market has softened, too, over the past two months as the recession bites deeper. Several scheduled projects are now rumoured to be shelved for the time being due to financial problems. Unsettling times all round

Metric Conversion

In the Beginning

The real estate industry in Atlantic Canada agreed to convert to metric measurement on the 1st January, 1979. We did; most didn't. Since we are still finding it rather lonely being the only one in step, we've prepared this ...

..... Hitchhikers Guide to Metrication

We have prepared the attached tableau for four representative types of real estate. Memorize it, astound your colleagues, or simply use it to interpret our appraisal reports.

Newsletter Kleptomaniacs

Several readers have informed us that they keep back issues of Newsletter. In an effort to encourage this endearing, albeit curious, habit we are in the process of making up binders. These three ring binders will have white vinyl covers overprinted in shocking purple with our attractive, and unintelligible logo. Definitely a collector's piece - they should grace any library.

Each binder will cost us, and you, \$11.50 each so we don't intend going ahead unless we get a minimum of 50 orders.

If you are interested please complete the attached order form. Do not send money with your order. You will be invoiced with your binder. (Bulk discounts available with every order in excess of 100 binders!).

ORDER FORM

Please send us _____ binders in white and shocking purple, overprinted with your lovely and unintelligible logo.

Please invoice us \$11.50/binder, with our order.
