## MARKET SURVEY (JUNE 2007) GREATER ST. JOHN'S OFFICES

## Scope

This survey included every office building with a total rentable area of 10,000 ft<sup>2</sup> or greater, available for rent in the Greater St. John's Area. Rental, operating expense and vacancy data was collected on 58 buildings with an aggregate rentable area of 2,595,870 ft<sup>2</sup> using a team of trained researchers. The survey successfully collected information on 96% of the rental stock polled. Data analysis prior to June 2006 is based on information gathered by a similar but smaller survey conducted by Cushman & Wakefield LePage for PWGSC.

## **Vacancy Rates**

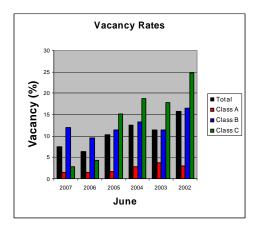

The vacancy rate *excludes* any space available for sub-lease: it is the total amount of space which is vacant and not currently leased. Our survey measured vacancy rates by class of building. Class A buildings command the highest rents in their community, have "presence" by virtue of their distinctive design and lobbies, and attract the largest firms of lawyers and accountants. Class B buildings offer "no frills" modern, airconditioned space. Tenants typically include second tier firms of lawyers and accountants, together with a wide selection of private sector companies, provincial and local government agencies. Class C buildings include all offices not classed as "A" or "B". The *overall* vacancy rate for office buildings was driven up in 2007 by an increase in Class B vacancy. The current vacancy rates in Greater St. John's are: Class A 1.54%; Class B 11.98%; Class C 2.85%; Overall 7.44%.

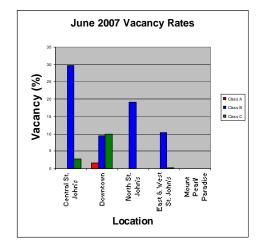

Our survey also measured the vacancy rate by geographic node. The graph indicates the vacancy rate for each building class in the various areas of Greater St. John's. The *overall* vacancy rate by location is as follows: Central St. John's 7.87%; Downtown 6.11%; North St. John's 16.16%; East & West St. John's 6.37%; Mount Pearl/Paradise 0%.

The *overall* vacancy rate is a useful predictor of changes in the net absolute rental rate/ft<sup>2</sup>. A falling vacancy rate portends increasing rents, and vice versa. Empirical data indicates that net absolute rent/ft<sup>2</sup> movements follow the following pattern in a *falling* vacancy rate market: Fairly Stable ( $\geq 12\% < 16\%$ ); Very Slight Increase, Reduced Rental Incentives ( $\geq 10\% < 12\%$ ); Slight Increase, Rental Incentives Removed ( $\geq 8\% < 10\%$ ); Modest Increase ( $\geq 6\% < 8\%$ ); Strong Increase ( $\geq 4\% < 6\%$ ); Major Increase (< 4%).

## Forecast (Next 12 months)

We anticipate that the overall vacancy rate will fall to 5.92% from the current 7.44%. The net absolute rent/ft<sup>2</sup> will increase by 15%.
