

MARKET SURVEY (JUNE 2008) GREATER MONCTON OFFICES

Scope

This survey included every office building with a total rentable area of 10,000 ft² or greater, available for rent in the Greater Moncton Area. Rental, operating expense and vacancy data was collected on 58 buildings with an aggregate rentable area of 2,830,464 ft² using a team of trained researchers. The survey successfully collected information on 98% of the rental stock polled. Data analysis prior to June 2006 is based on information gathered by a similar but smaller survey conducted by Cushman & Wakefield LePage for PWGSC.

Vacancy Rates

The vacancy rate **excludes** any space available for sub-lease: it is the total amount of space which is vacant and not currently leased. Our survey measured vacancy rates by class of building. Class A buildings command the highest rents in their community, have “presence” by virtue of their distinctive design and lobbies, and attract the largest firms of lawyers and accountants. Class B buildings offer “no frills” modern, airconditioned space. Tenants typically include second tier firms of lawyers and accountants, together with a wide selection of private sector companies, provincial and local government agencies. Class C buildings include all offices not classed as “A” or “B”. The vacancy rate for all classes of office buildings has fallen since last year and the overall vacancy rate decreased in each of the past 3 years. The current vacancy rates in Greater Moncton are: Class A 8.73%; Class B 12.08%; Class C 12.14%; Overall 10.88%.

Our survey includes all the major centres in Atlantic Canada. The graph indicates the vacancy rate for each building class in each city. The **overall** vacancy rate by location is as follows: Greater Fredericton 6.24%; Greater Saint John 5.70%; Greater Moncton 10.88%; Greater St. John’s 3.68%; Halifax Regional Municipality 6.44%; Greater Charlottetown 11.17%.

The **overall** vacancy rate is a useful predictor of changes in the net absolute rental rate/ft². A falling vacancy rate portends increasing rents, and vice versa. Empirical data indicates that net absolute rent/ft² movements follow the following pattern in a **falling** vacancy rate market: Fairly Stable (≥ 12% < 16%); Very Slight Increase, Reduced Rental Incentives (≥ 10% < 12%); Slight Increase, Rental Incentives Removed (≥ 8% < 10%); Modest Increase (≥ 6% < 8%); Strong Increase (≥ 4% < 6%); Major Increase (< 4%).

Forecast (Next 12 months)

We anticipate that the overall vacancy rate will decrease to 9.60% from the current 10.88%. There will be a 3% increase in the net absolute rent/ft.².
