

MARKET SURVEY (JUNE 2008) GREATER SAINT JOHN OFFICES

Scope

This survey included every office building with a total rentable area of 10,000 ft² or greater, available for rent in the Greater Saint John Area. Rental, operating expense and vacancy data was collected on 37 buildings with an aggregate rentable area of 2,100,148 ft² using a team of trained researchers. The survey successfully collected information on 92% of the rental stock polled. Data analysis prior to June 2006 is based on information gathered by a similar but smaller survey conducted by Cushman & Wakefield LePage for PWGSC.

Vacancy Rates

The vacancy rate **excludes** any space available for sub-lease: it is the total amount of space which is vacant and not currently leased. Our survey measured vacancy rates by class of building. Class A buildings command the highest rents in their community, have “presence” by virtue of their distinctive design and lobbies, and attract the largest firms of lawyers and accountants. Class B buildings offer “no frills” modern, airconditioned space. Tenants typically include second tier firms of lawyers and accountants, together with a wide selection of private sector companies, provincial and local government agencies. Class C buildings include all offices not classed as “A” or “B”. The **overall** vacancy rate for office buildings has been declining since 2005 and is currently at a six year low. The current vacancy rates in Greater Saint John are: Class A 5.50%; Class B 2.32%; Class C 23.69%; Overall 5.70%.

Our survey includes all the major centres in Atlantic Canada. The graph indicates the vacancy rate for each building class in each city. The **overall** vacancy rate by location is as follows: Greater Fredericton 6.24%; Greater Saint John 5.70%; Greater Moncton 10.88%; Greater St. John’s 3.68%; Halifax Regional Municipality 6.44%; Greater Charlottetown 11.17%.

The **overall** vacancy rate is a useful predictor of changes in the net absolute rental rate/ft². A falling vacancy rate portends increasing rents, and vice versa. Empirical data indicates that net absolute rent/ft² movements follow the following pattern in a **falling** vacancy rate market: Fairly Stable ($\geq 12\% < 16\%$); Very Slight Increase, Reduced Rental Incentives ($\geq 10\% < 12\%$); Slight Increase, Rental Incentives Removed ($\geq 8\% < 10\%$); Modest Increase ($\geq 6\% < 8\%$); Strong Increase ($\geq 4\% < 6\%$); Major Increase ($< 4\%$).

Forecast (Next 12 months)

We anticipate that the overall vacancy rate will rise to 7.24% from the current 5.70% as new inventory is brought on stream. There will be a 2.5% increase in the net absolute rent/ft².
