

MARKET SURVEY (JUNE 2009) GREATER ST. JOHN'S WAREHOUSES

Scope

This survey included every warehouse building with a total rentable area of 20,000 ft² or greater, available for rent in the Greater St. John's Area. Rental, operating expense and vacancy data was collected on 106 buildings with an aggregate rentable area of 2,462,697 ft², using a team of trained researchers. The survey successfully collected information on 84% of the rental stock polled. Data analysis prior to June 2006 is based on information gathered by a similar but smaller survey conducted by Cushman & Wakefield LePage for PWGSC.

Vacancy Rates

The vacancy rate **excludes** any space available for sub-lease: it is the total amount of space which is vacant and not currently leased. Vacancy rates prior to June 2006 are based on data collected by the Cushman & Wakefield LePage surveys, and employ heuristic algorithms which compensate for missing data. After spiking to 7.60% in 2008, the vacancy rate dropped by one and a half percentage points in June. The current vacancy rate is 6.03%.

Our survey also measured the vacancy rate by geographic node. The graph indicates the current vacancy rate in each of the following locations: Central and Downtown 1.36%; East St. John's 0%; West St. John's 0%; North St. John's 8.74%; Mount Pearl/Paradise 6.06%.

The **overall** vacancy rate is a useful predictor of changes in the net absolute rental rate/ft². A falling vacancy rate portends increasing rents and vice versa. Empirical data indicates that net absolute rent/ft² movements follow the following pattern in a **falling** vacancy rate market: Fairly Stable ($\geq 12\% < 16\%$); Very Slight Increase, Reduced Rental Incentives ($\geq 10\% < 12\%$); Slight Increase, Rental Incentives Removed ($\geq 8\% < 10\%$); Modest Increase ($\geq 6\% < 8\%$); Strong Increase ($\geq 4\% < 6\%$); Major Increase ($< 4\%$).

Forecast (Next 12 months)

We anticipate that the overall vacancy rate will jump to 8.46% from the current 6.03% as demand tapers off. Net absolute rents/ft.² will remain relatively stable.
