

# MARKET SURVEY (DECEMBER 2009) GREATER FREDERICTON OFFICES

## Scope

This survey included every office building with a total rentable area of 10,000 ft<sup>2</sup> or greater, available for rent in the Greater Fredericton Area. Rental, operating expense and vacancy data was collected on 47 buildings with an aggregate rentable area of 2,025,502 ft<sup>2</sup> using a team of trained researchers. The survey successfully collected information on 100% of the rental stock polled. Data analysis prior to June 2006 is based on information gathered by a similar but smaller survey conducted by Cushman & Wakefield LePage for PWGSC.

## Vacancy Rates

The vacancy rate **excludes** any space available for sub-lease: it is the total amount of space which is vacant and not currently leased. Our survey measured vacancy rates by class of building. Class A buildings command the highest rents in their community, have “presence” by virtue of their distinctive design and lobbies, and attract the largest firms of lawyers and accountants. Class B buildings offer “no frills” modern, airconditioned space. Tenants typically include second tier firms of lawyers and accountants, together with a wide selection of private sector companies, provincial and local government agencies. Class C buildings include all offices not classed as “A” or “B”. Fredericton has bucked the recession so far, with the **overall** vacancy rate falling from 5.61% in 2008. The current vacancy rates in Greater Fredericton are: Class A 1.52%; Class B 7.50%; Class C 9.81%; Overall 5.35%.

Our survey includes all the major centres in Atlantic Canada. The graph indicates the vacancy rate for each building class in each city. The **overall** vacancy rate by location is as follows: Greater Fredericton 5.35%; Greater Saint John 11.21%; Greater Moncton 10.80%; Greater St. John’s 4.64%; Halifax Regional Municipality 8.37%.

The **overall** vacancy rate is a useful predictor of changes in the net absolute rental rate/ft<sup>2</sup>. A falling vacancy rate portends increasing rents, and vice versa. Empirical data indicates that net absolute rent/ft<sup>2</sup> movements follow the following pattern in a **falling** vacancy rate market: Fairly Stable ( $\geq 12\% < 16\%$ ); Very Slight Increase, Reduced Rental Incentives ( $\geq 10\% < 12\%$ ); Slight Increase, Rental Incentives Removed ( $\geq 8\% < 10\%$ ); Modest Increase ( $\geq 6\% < 8\%$ ); Strong Increase ( $\geq 4\% < 6\%$ ); Major Increase ( $< 4\%$ ).

## Forecast (Next 12 months)

We anticipate that the overall vacancy rate will decrease to 4.04% from the current 5.35% as demand increases moderately. The net absolute rent/ft<sup>2</sup> will increase by 2.00%.
